Volume 49—Contents

NO. 1. JANUARY 1969

1 Nonrespiratory Functions of Mammalian Lung
H. O. Heinemann and A. P. Fishman

48 Cytochrome Oxidase
M. R. Lemberg

112 Hypotheses on Physiological Roles of Prostaglandins
E. W. Horton

NO. 2. APRIL 1969

163 Chromium Occurrence and Function in Biological Systems
Walter Mertz

240 Hypothalamic Pituitary Stimulating and Inhibiting Hormones
Samuel McDonald McCann and John C. Porter

285 Intracellular pH
William J. Waddell and Roger G. Bates

330 Brown Fat and Thermogenesis
Robert Emrie Smith and Barbara A. Horwitz

NO. 3. JULY 1969

427 Energetics of Muscular Contraction
W. F. H. M. Mommaerts

509 Kallikreins and Kinins
M. Schachter

548 Thyrocalcitonin
Philip F. Hirsch and Paul L. Munson

623 Methylated Ribonucleic Acids
Jason L. Starr and Bruce H. Sells

NO. 4. OCTOBER 1969

671 Heat Regulation: Homeostasis of Central Temperature in Man
T. H. Benzinger

760 Crystal Chemistry of Bone Mineral
Aaron S. Posner

793 Protoplasmic Movements Within Cells
Theodore L. Jahn and Eugene C. Bovee

863 Rheology of Blood
Edward W. Merrill
